

Summit B.t.i. Briquets

Distributor: AMGUARD Environmental Technologies

Registrant: SUMMIT CHEMICAL CO. DBA SUMMIT RESPONSIBLE SOLUTIONS

GENERAL

EPA Registration Number:	6218-47	Signal Word:	CAUTION
CA Registration Number:	6218-47-ZC		
Active Ingredient:	10.31 - Bacillus thuringiensis subspecies israelensis solids, spores and insecticidal toxins	Application Methods:	Ground
Label Version:		Mode of Action:	IRAC 11A
Physical State:	Dry	Toxic To:	None
Product Type:	Insecticide	Rainfastness:	
Formulation Type:	Pellets		

ADDITIONAL INFORMATION

Federally Restricted:	No		
Organic Certifications:	None	Other Certifications:	None
Posting Required:	No	Closed Mixing System Required:	All applications in All States/Provinces: Not required
Oral Notification Required:	No	Avoid Grazing:	Yes

CALIFORNIA

Registration #:	6218-47-ZC	CA Restricted:	No
CA NOI Required:	No		

REGISTERED FOR USE IN

PACKAGE TYPES

1 CS Package(s) 5X20PKS

****Specific Notices will not be shown until a pest is selected.**

SAFETY

PPE Information:	
Re-Entry PPE Information:	No Information Available
Transport Information:	SPECIAL SHIPPING INFORMATION None
Response Number:	800-424-9300
Medical Number:	800-424-9300
SDS Hazard ID Signal Word:	Not Available - MSDS

GENERAL NOTICE 1

Hazard to Humans: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. Environmental Hazards: Do not apply directly to treated, finished drinking water reservoirs or drinking water receptacles when the water is intended for human consumption. FIRST AID If in eyes Hold eye open and rinse slowly and gently for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call poison control center or doctor for treatment advise.

GENERAL NOTICE 2

DIRECTIONS FOR USE It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Summit B.t.i. BRIQUETS/DUNKS are formulated to release effective levels of Bti for a period of 30 days or more under typical environmental conditions. The floating action of the briquets/dunks will ensure that active material is released at the surface as well as gradually settle to the bottom. These briquets/dunks may be used in all types of mosquito breeding areas. To prevent briquets/dunks from being flushed out of certain treatment sites, they can be anchored using string tied through the hole in the center or staked in place. Summit B.t.i. BRIQUETS/DUNKS can also be used for pre-flood treatment. If the briquets/dunks are applied to dry areas which are known or suspected to become breeding sites when flooded, such as woodland pools and abandoned swimming pools, the briquets will float to the surface when flooding occurs and start releasing the active Bti material. Alternate wetting and drying will not reduce their effectiveness. General Information; Mosquito Dunks float on water and will keep on working for 30 days or longer under typical environmental conditions. While floating, they slowly release a long-term, biological mosquito larvicide at the water's surface. This larvicide gradually settles in the water where it is eaten by mosquito larvae growing there. Mosquito Dunks may be used in all standing water sites where mosquito larvae grow. Alternate wetting and drying will not reduce their effectiveness.
